

# Systems Geotechnique Policy Statements

## **Health and Safety at Work**

Systems Geotechnique Limited intends to comply with UK health, safety and welfare legislation in respect of health, safety and welfare at work. This intent includes compliance with the Health and Safety at Work Act 1974. The company realises its responsibilities in relation to both its own employees and those of its clients, subcontractors, and others affected by its work and with this mind makes the following statement:

It is our policy that, as far as is reasonably practicable, we will provide:

- Well maintained plant and safe systems of work.
- Suitable arrangements for the safe use, handling, storage and transport of articles and substances,
- Adequate information, instruction, training and supervision to enable work to be carried out safely.
- Safe premises and work places including access to and egress from them.
- Safe working environments with adequate welfare facilities.
- Consultation, communication and advisory facilities as required to comply with the current Health & Safety (Consultation with Employees) Regulations.
- Designs which recognise, include and apply safe practice during preparation, construction and subsequent operational use and maintenance after completion of the project.

## **Quality**

Systems Geotechnique Limited believes that it is very important that our company delivers a very high standard of service to all our clients. Furthermore we believe that the success of our business will depend on the quality of our service and therefore the pursuit of excellence is not an option but a necessity to the continued growth of the company and its profitability.

We are committed to achieve the following to reach our goal :

- Quality through being right first time.
- Commitment to achieve quality by all our staff and operatives.
- Quality through effective communication between all employees of the Company.
- Quality in the finished product from concept through design, materials choice, construction and finally handing over to the client.

Our policy states our commitment and aims to achieve the delivery of a quality product to our clients. Whilst we have not yet reached the stage of gaining accreditation to BS EN ISO 9000, at the time of writing we are working to that objective before the end of 2003.

## **The Environment**

Systems Geotechnique Limited recognises the importance of environmental issues and is committed to a programme of continuous improvement designed to minimise the environmental impact of the company's operations. We are working towards Environmental accreditation and recognition of our achievements in the near future.
